

PROFESSIONAL PROFILE

Matthew Gosling – Company Director, NSW Justice of the Peace,
Projects Manager, Senior Estimator

Introduction

After leaving high school, Matt joined his family's business which has been servicing the Coffs Harbour and surrounding regions since 1975.

Over the following years, he attained his telecommunications and security licences to enhance the company's profile, followed by qualifications in renewable and solar systems. These enhancements to the company's core activities brought solid growth which then continued into the contestable electrical works industry.

Seeing an opening in the Authorised Services Provider market, Matt spearheaded the growth and diversification of the company for it to now have a solid reputation as one of the most sort after electrical construction and design businesses in NSW.

Team work, communication and passion are some of Matt's most well-known attributes.

Qualifications

- Certificate III in Electrical – Mechanic – Fitter/Mechanic (Trade) (Credit Level); NSW TAFE
- Certificate III in ESI – Power Systems – Distribution Overhead (Linesman); NSW TAFE
- Essential Energy Authorised Service Provider AP93302 (Level 1 Overhead Powerline Construction and Competent Assistant, and Level 2 Categories 1, 2, 3 & 4)

Project Experience

Essential Energy

- Through provision of documentation and determination, successfully managed Gosling Electrical's appointment on to Essential Energy's "Authorised Service Providers" Network Panel which has been held concurrently for three years.

Roads and Maritime Services Pacific Highway Works

- OHL-YORK JV: Project manager and lead foreman of the Woolgoolga to Halfway Creek highway realignment; inclusive of high and low voltage relocation and additions, transformer installations, liaising and problem solving for vegetation/environmental concerns, and access and community liaising.
- CMC Civil: Project manager and lead foreman of the Halfway Creek to Glenugie highway realignment; inclusive of high and low voltage relocation and additions, transformer installations, liaising and problem solving for vegetation/environmental concerns, access and community liaising.

Subdivisions

- Administered end-to-end completion over 1000+ subdivided lots both in residential underground to rural overhead construction at a wide-range of locations between Port Macquarie in the south, Tweed Heads in the north and Gunnedah in the west. A large portion of these were multi-stage developments.

PROFESSIONAL PROFILE: Matthew Gosling

Director and Senior Estimator

- *Financial focus and assistance is Matt's key aim for the client, a roll that has him well known for honest assessment and feedback for both design and construction involvement.*
- *Passed on qualities from his father Trevor, "a lasting working relationship is far better than a one-time project. Provide the customer with their best option for scope and price and a repeat customer will be made".*
- *Part of this role has required Matt to have a large involvement with Essential Energy and their policies and procedures. The sound and extensive knowledge he has acquired has enabled quick proactive and reactive engagement with developers, consultants, principles and other industry equivalents.*
- *Engagement of design advice and consultation has been a key role through projects such as the recent highway realignments (Pacifico: Macksville to Nambucca; OHL-YORK: Woolgoolga to Halfway Creek; CMC Civil: Halfway Creek to Glenugie; Fulton Hogan: Grafton Bridge and abutments; Pacifico: Harwood Bridge and abutments) councils, developers and many more.*
