### Client Testimonial

*“Gosling Electrical won the open tender to carry out electrical reticulation on the Woolgoolga to Halfway Creek upgrade of the Pacific Highway.*

*As the senior engineer assigned to this project, I have dealt extensively with the people from Gosling Electrical and I am happy to say that on all occasions, I have found their communication to be excellent.*

*This is a complex project requiring the relocation and installation of power poles and overhead cabling as well as the installation of many electrical substations, many with difficult access issues. This has resulted in many alterations to plans.*

*My experience has been that the Gosling staff have proved to be very flexible and readily able to meet changing requirements and schedules as well as offering very worthwhile, practical solutions to issues arising.*

*The standard of their completed works has been excellent, and I have no issues with recommending this company to anyone requiring electrical Level 1 or 2 ASP services.”*
