Client Testimonial

"Gosling electrical were engaged by Pacifico mid-2015 to complete electrical relocations as a Level 1 ASP on the Warrell Creek to Nambucca Heads Pacific Highway Upgrade project. The scope of works involved relocation of some 10 km of existing 11 kV and Low Voltage electrical infrastructure. Gosling Electrical provided professional and reliable services to the project in the following capacity:

- *Technical assistance with design development including independent peer review of Level 3 ASP designs;*
- *Guidance on Essential Energy guidelines, regulations and relevant legislation for power infrastructure;*
- *Assist in liaison with affected landowners and provide explanation of works to be completed;*
- *Develop detailed staging plans of the program works and minimise service interruptions to project facilities and affected residents;*
- *Procure and construct electrical infrastructure in accordance with Essential Energy requirements;*
- *Complete closeout documentation and project finalisation activities.*

Gosling Electrical truly provide a complete 'start to finish' service to their clients from design development through to construction and project closeout. At each stage of the project they have been mindful of all stakeholders including Essential Energy's network maintenance obligations, Pacifico's program deadlines and the impact of the works on members of the community.

Gosling Electrical are a very nimble contractor and have the ability to respond to the client's needs at each stage of the project. On the Pacifico project they have provided a high level of service."
